

**WHEN  
WILL  
DARKNESS  
END....?**

**DOCTOR KOTI KAPUGANTI**

### 1. ORIGIN OF CORONA

No one is there across the globe, who not heard about CORONA. In the earlier days, it is only limited to China, where it first came in to existence and after that it spread very rapidly across the globe, leaving no country unaffected.

In the early days people are fearless and not worried about Corona and took it not seriously thinking that this virus is also like other non-dangerous viruses as it is only somewhere in China. Now the situation is not like that. People are frightening and trembling about Corona, no sooner it will knock their doors at any moment and are not even coming out on to the roads, unless they wear masks and using sanitizers.

Doctors warned that aged people are highly and easily affected by this disease. So that aged people are only limited to their rooms and maintaining self isolation.

In ancient days our older generations are mostly god fearing; thought about what is good, what is bad, morality and justice. But gradually there are no such values in the present generation. Only they are thinking about themselves, living as they like without any moral values and restrictions.

People are in a blind thought that money makes many things. But with the big blow of Corona, now people are looking towards God, and thinking about moral values and showing humanity towards others.

### 4. SYMPTOMS OF CORONA :

Doctors initially recognized fever, dry cough and severe weakness are the symptoms of corona and after these are getting incurable they confirmed this as Corona. Apart from these, we can find severe chest pain and breathing problem also.

When we got in to contact with a corona infected person, this will infect through inhalation. Or by touching or rubbing our eyes, nose or lips with our hands after getting contact with the corona infected places or surfaces like door knobs, handles, lift buttons, table surfaces, etc.

Fever, dry cough and severe weakness are found to be the basic symptoms of Corona. But, only after these symptoms become severe, then only Doctors confirm as Corona.

Chest pain, problem in breathing, unable to move freely, and unable to speak are the main symptoms.

If we get into contact with a corona infected person, later by breathing, touching, the surfaces which are previously touched by the corona affected person, thereby rubbing our face, nose, eyes and mouth, the virus get in to our body.

The main reason for getting fever and body pains when infected with Corona is Cytokines.

## FOUR PERSONS – THEIR PREDICTIONS ABOUT CORONA

### SAINT POTURULI VEERABRAHMENDRA SWAMY :

Potuluri Veerabrahmendra Swamy is a saint of 17<sup>th</sup> century of India. His KAALA GNANAM (Book of prophecies) is most popular in the world.

Many things which are going to happen in the near future were explained in his book. He lived in a cave near

Ravvala Konda village, Kadapa District, Andhra Pradesh, India. During the days he lived in the cave, he wrote the Kaala Gnanam. Historians found the scriptures written on palm leaves and revealed the secrets of his predictions.

In his book of predictions, the saint wrote in poem no. 114 about covid-19. The name of the diseases was mentioned it as KORANKI.

Most of the people are looking at the poem across the world. No one is able to understand how a person belonged to 17<sup>th</sup> century wrote about Corona of 21<sup>st</sup> century. This is not so easy to be ruled out, because many such predictions have come true.
